Sir C. V. Raman

(November 7, 1888 to November 21, 1970)

Chandrasekhar Venkata Raman was born at Tiruchirappalli in Tamil Nadu on 7th November 1888. He finished his secondary school education at the tender age of thirteen and entered the Mrs. A.V.N. College at Vishakhapatnam. He received his B.A. degree with honors in Physics and English. Raman continued his studies at the Presidency College and when he was barely eighteen, graduated at the top of his class and received his M.A. He made enormous contributions to research in the areas of vibration, sound, musical instruments, ultrasonic, diffraction, photoelectricity, colloidal particles, X-ray diffraction, magnetron, dielectrics. South Indian Science Association and the Science Club of Central College, Bangalore, he announced his discovery of what is now known as the Raman Effect. He was knighted in 1929, and in 1930, became the first Asian scientist to be awarded the Nobel Prize for Physics for his discoveries relating to the scattering of light (The Raman Effect). In 1934, He became the Director of the newly established Indian Institute of Science at Bangalore, where he remained till his retirement. After retirement, he established the Raman Research Institute at Bangalore, where he served as the Director. The Government of India conferred upon him its highest award, the Bharat Ratna in 1954.
