Re: Internship Offer

We would like to congratulate you on being selected for the **"Software Intern"** Internship position with **O2CloudSystems LLC**.

Title: Your Title will be "Software Intern" and you will report to Manager or as otherwise directed by the company CEO.

Looking into requirements of engineering students of Indian Engineering colleges, company has designed this internship program as a Corporate Social Responsibility (CSR), wherein company is providing free of cost training to selected students. Hence neither of the party will get financial benefit out of it.

Roles and responsibilities

1. Developing code as per industry standards.
2. Writing test cases, test and debugging code.
3. Documentation.
4. Sharing tasks with team lead.
5. Knowledge transfer to colleagues in case you are unable to proceed.
6. Keeping confidentiality of the company's task and not to disclose and misuse the same.

What is your takeaway?

1. Opportunities to work with highly skilled and smart technocrat of Silicon Valley of USA.
2. To learn how to identify a problem.
3. To analyze various solutions to the problem.
4. How to apply specific solution.
5. How to validate the results.
6. How to deploy the solution.
7. How to record deployment observations.
8. You will learn all industry standards of design and coding practices.
9. You will learn soft skills like presentation skills, negotiation skills, team building and group discussion and leadership skills.
