RECOMMENDATION LETTER

To whomsoever it may concern,

It is with great pleasure that I write in recommendation of Vaishnav Mandlik that he was an Intern with Beat The Virus Startup from 9th January 2021 to 10th April 2021.

Beat The Virus Startup provides immunity services and products for preventing coronavirus and creating life long health.

He provided our organisation with a range of services including his work in App and Web teams. He made UI/UX layouts for sections of App. He was extremely helpful in assisting the organisation in different course of events. He willingly took on new tasks and looked actively for the best way to contribute, showing flexibility and team spirit.

His creativity and perseverance were thus an important contribution to the success of all of the events and projects that he worked on, and thereby helped to raise the organisation's morale and productivity.

Warmest Regards,

Vishal Bhuta

Founder & CEO
