## Department of Computer Engineering

### Report of event - Codigo

**Date:** 14.12.2021

As a part of ISTE student chapter, department organized an offline coding event. This event consisted of two rounds – blind coding & debugging. Total 64 students from both divisions participated in this competition.

Following were objectives of this event:

- **Blind coding:** To test the proficiency and coder's capabilities to remember the track of the program. This event includes the basic problem statements.
- **Debugging:** To find out the defect/error/bugs and remove them and run the code successfully

In first round problem statement was given based on switch case. Out of 64 , 32 students were shortlisted for debugging. Correct output, number of errors was the selection criteria

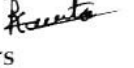

- Few snaps taken during program -

In second round, two code snippets were given for debugging. Students were asked to remove the errors from the code to get the desired output. Students enjoyed this event a lot & in blind coding event students learned to concentrate while typing the program. Also the skills like feeding error free program with least errors were also developed.

Following were the winners of the event:

1. Mr. Harsh Sunil Chhajed
2. Mr. Aakash Balasaheb Lawande
3. Mr. Gaurav Bhima Chaudhari

This was the first event of programming for students and they requested to organize more & more such events.
