The screenshot shows the Eclipse IDE interface. The Package Explorer on the left shows a project named 'mysql' with a source folder 'src' containing the file 'HelloWorld.java'. The main editor window displays the following Java code:

```
1 package mysql;
2
3 public class HelloWorld {
4     public static void main(String args[]) {
5         System.out.println("Hello World.");
6     }
7 }
```

The Console window at the bottom shows the output of the program:

```
<terminated> HelloWorld [Java Application] /usr/lib/jvm/java-1.7.0-openjdk-1.7.0.75-2.5.4.2.fc20.x86_64/bin
Hello World.
```

The status bar at the bottom indicates 'Writable', 'Smart Insert', and '7 : 1'.

En 11:11 AM

```
sl4lab@sl4lab-HP-ProDesk-400-G1-SFF:~$ javac
```

```
Usage: javac <options> <source files>
```

```
where possible options include:
```

```
-g                Generate all debugging info
-g:none          Generate no debugging info
-g:{lines,vars,source}  Generate only some debugging info
-nowarn          Generate no warnings
-verbose         Output messages about what the compiler is doing
-deprecation     Output source locations where deprecated APIs are used
-classpath <path>  Specify where to find user class files and annotation processors
-cp <path>        Specify where to find user class files and annotation processors
-sourcepath <path> Specify where to find input source files
-bootclasspath <path>  Override location of bootstrap class files
-extdirs <dirs>     Override location of installed extensions
-endorseddirs <dirs>  Override location of endorsed standards path
-proc:{none,only}  Control whether annotation processing and/or compilation is done.
-processor <class1>[,<class2>,<class3>...] Names of the annotation processors to run; bypasses default discovery process
-processorpath <path> Specify where to find annotation processors
-parameters      Generate metadata for reflection on method parameters
-d <directory>    Specify where to place generated class files
-s <directory>    Specify where to place generated source files
-h <directory>    Specify where to place generated native header files
-implicit:{none,class} Specify whether or not to generate class files for implicitly referenced files
-encoding <encoding> Specify character encoding used by source files
-source <release>  Provide source compatibility with specified release
-target <release>  Generate class files for specific VM version
-profile <profile> Check that API used is available in the specified profile
-version          Version information
-help            Print a synopsis of standard options
-Akey[=value]    Options to pass to annotation processors
-X              Print a synopsis of nonstandard options
-J<flag>         Pass <flag> directly to the runtime system
-Werror         Terminate compilation if warnings occur
@<filename>     Read options and filenames from file
```

```
sl4lab@sl4lab-HP-ProDesk-400-G1-SFF:~$ java
```

```
Usage: java [-options] class [args...]
```

```
(to execute a class)
```

```
or java [-options] -jar jarfile [args...]
```

```
(to execute a jar file)
```

```
where options include:
```

```
-d32      use a 32-bit data model if available
-d64      use a 64-bit data model if available
```

## Maintenance Procedure for Computer Department

<b>Laboratory</b>	
Computers	Computers (software)are checked at the semester starting and end of semester
DLP Projectors	DLP Projectors are checked at the semester staring and end of semester
UPS	UPS are checked at the semester starting and end of semester
Hardware Kits	Hardware kits are working properly checked at the semester starting and end of semester
Furniture	Is there is need of furniture are checked at the semester starting and end of semester
<b>Class Rooms</b>	
Projector	Projectors are checked at the semester staring and end of semester
Furniture	Is there is need of furniture are checked at the semester starting and end of semester

<i>Input</i>	Lab equipment, Equipment manual
--------------	---------------------------------

<b>Sr.</b>	<b>Activity</b>	<b>Responsibility</b>	<b>Stage Out put</b>
01	Codify the lab equipment.	Lab Asst.	Dead Stock Register
02	Determine the frequency and parameters for preventive maintenance of equipment.	Lab Asst.	Preventive maintenance Checklist
03	Carry out the maintenance as per plan and maintain record of maintenance work carried out. Also maintain record of repair / replacement carried out during maintenance.	Lab Asst.	Equipment History card
04	In case of breakdown, repair the fault internally and / or with the help from external agency.	Lab Asst.	--
05	Maintain record of maintenance carried out.	Lab Asst.	Equipment History card
06	At the end of semester, collect the data related to breakdowns, identify major and / or repetitive failure, analyze and initiate necessary actions to eliminate recurrence.	Lab Asst.	Corrective Action Report
07	In case if it is not possible to rectify the fault internally, give intimation to the Principal; seek permission, Obtain a copy of Work order from the Purchase.	HOD	
08	Get the fault attended by the service engineer, take trials to ensure smooth operations, put signature on the bill / service report with specific remark (if any) related to behavior and timeliness in attending the problems.	HOD, Conc. Lab Asst.	
<i>Output</i>	Equipment maintained in good working condition.		

<b>Process Monitoring &amp; Measurement</b>					
<b>Parameter</b>	<b>Indicator</b>	<b>Measurement Methodology</b>	<b>Frequency of Monitoring</b>	<b>Responsibility</b>	<b>Document Retention</b>
Execution of Preventive maintenance	Plan Vs Actual	Plan Vs Actual of Preventive maintenance schedule	Every Semester	Lab. Incharge and Lab. Assistant/ Tech. Assistant	Preventive maintenance checklist
Failure/damage of the equipment/instrument	Number	Number of failures/Number of damaged equipment in a semester	Every Semester	Lab. Incharge and Lab. Assistant/ Tech. Assistant	Equipment History Record
Timely repair of damaged instrument/equipment	Days	Number of days taken to repair	Every Semester	Lab. Incharge and Lab. Assistant/ Tech. Assistant	Review of repair work

# Department of Electronics and Computer Engineering

## *4.3.1 Institution frequently updates its IT facilities including Wi-Fi*

Electronics and Computer department has Programming Language, IoT and Embedded System, DBMIS labs and adequate IT infrastructure to meet curriculum requirements and changing technology. Through these laboratories, students perform practicals on various electronics application softwares such as XILINX, POWERSIM, ALTIUM DESIGNER, NI ACADEMIC LABVIEW. All computers are interconnected by LAN with Internet facility. Students are promoted to use open-source software such as SCILAB and OCTAVE, JDK, VSCode, Apache NetBeans, Star UML, Eclipse, G++, gcc, SSH, My-sql server and client for the curriculum base or beyond curriculum practicals. Department has four LCD Projector, three LaserJet printer.

### **List of number of laboratories and their Geo tagged photos:**

1. Xilinx Software

The screenshot displays the Xilinx ISE Project Navigator interface. The main window shows the 'Design Summary' for the project 'parity\_assign'. The interface includes a menu bar, a toolbar, and several panels:

- Design Overview:** A tree view showing the project hierarchy, including 'Summary', 'IOB Properties', 'Module Level Utilization', 'Timing Constraints', 'Pinout Report', 'Clock Report', 'Static Timing', 'Errors and Warnings', 'Parser Messages', 'Synthesis Messages', 'Translation Messages', 'Map Messages', 'Place and Route Messages', 'Timing Messages', 'Bitgen Messages', 'All Implementation Messages', 'Detailed Reports', and 'Synthesis Report'.
- Design Properties:** A section for configuring the design, including 'Enable Message Filtering' and 'Optional Design Summary Contents' (Show Clock Report, Show Failing Constraints, Show Warnings, Show Errors).
- parity\_assign Project Status:** A table providing key project information:
 

Property	Value	Property	Value
Project File:	expa.xise	Parser Errors:	No Errors
Module Name:	parity_assign	Implementation State:	Synthesized
Target Device:	xc6sxb9-3tgg144	Errors:	No Errors
Product Version:	ISE 13.1	Warnings:	No Warnings
Design Goal:	Balanced	Routing Results:	
Design Strategy:	Xilinx Default (unlocked)	Timing Constraints:	
Environment:	System Settings	Final Timing Score:	
- Device Utilization Summary (estimated values):** A table showing resource usage:
 

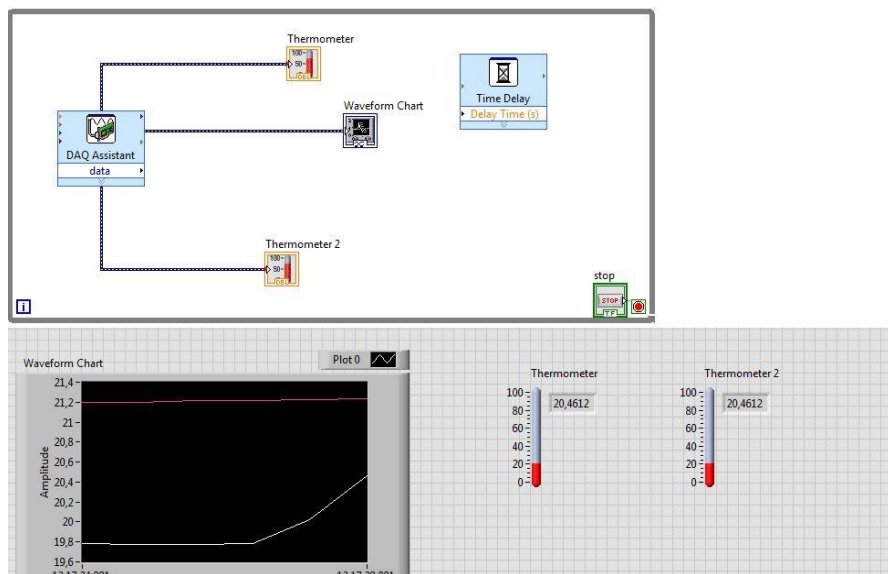

Logic Utilization	Used	Available	Utilization
Number of Slice LUTs	1	5720	0%
Number of fully used LUT-FF pairs	0	1	0%
Number of bonded IOBs	5	102	4%
- Detailed Reports:** A table listing generated reports:
 

Report Name	Status	Generated	Errors	Warnings	Infos
Synthesis Report	Current	Thu Dec 3 15:21:37 2020	0	0	0
- Console:** A log window at the bottom showing messages from the HDL Compiler and Project Manager, including 'Analyzing Verilog file' and 'Parsing design hierarchy completed successfully'.

LINUX SCOOP

The screenshot displays the Eclipse IDE interface. On the left, the Package Explorer shows a project named 'mysql' with a sub-package 'mysql' containing the file 'HelloWorld.java'. The central Editor window shows the following Java code:

```
1 package mysql;
2
3 public class HelloWorld {
4     public static void main(String args[]) {
5         System.out.println("Hello World.");
6     }
7 }
```

On the right, the Task List panel contains a 'Connect Mylyn' notification. Below it, the Outline panel shows the project structure with 'HelloWorld' selected, and a method 'main(String[])' listed. At the bottom, the Console panel shows the output of the program:

```
<terminated> HelloWorld [Java Application] /usr/lib/jvm/java-1.7.0-openjdk-1.7.0.75-2.5.4.2.fc20.x86_64/bin
Hello World.
```

The status bar at the bottom indicates 'Writable', 'Smart Insert', and '7 : 1'.

En 11:11 AM

```
sl4lab@sl4lab-HP-ProDesk-400-G1-SFF:~$ javac
```

```
Usage: javac <options> <source files>
```

```
where possible options include:
```

```
-g                Generate all debugging info
-g:none          Generate no debugging info
-g:{lines,vars,source}  Generate only some debugging info
-nowarn          Generate no warnings
-verbose         Output messages about what the compiler is doing
-deprecation     Output source locations where deprecated APIs are used
-classpath <path>  Specify where to find user class files and annotation processors
-cp <path>        Specify where to find user class files and annotation processors
-sourcepath <path> Specify where to find input source files
-bootclasspath <path>  Override location of bootstrap class files
-extdirs <dirs>     Override location of installed extensions
-endorseddirs <dirs>  Override location of endorsed standards path
-proc:{none,only}  Control whether annotation processing and/or compilation is done.
-processor <class1>[,<class2>,<class3>...] Names of the annotation processors to run; bypasses default discovery process
-processorpath <path> Specify where to find annotation processors
-parameters      Generate metadata for reflection on method parameters
-d <directory>    Specify where to place generated class files
-s <directory>    Specify where to place generated source files
-h <directory>    Specify where to place generated native header files
-implicit:{none,class} Specify whether or not to generate class files for implicitly referenced files
-encoding <encoding> Specify character encoding used by source files
-source <release>  Provide source compatibility with specified release
-target <release>  Generate class files for specific VM version
-profile <profile> Check that API used is available in the specified profile
-version          Version information
-help            Print a synopsis of standard options
-Akey[=value]    Options to pass to annotation processors
-X              Print a synopsis of nonstandard options
-J<flag>         Pass <flag> directly to the runtime system
-Werror          Terminate compilation if warnings occur
@<filename>     Read options and filenames from file
```

```
sl4lab@sl4lab-HP-ProDesk-400-G1-SFF:~$ java
```

```
Usage: java [-options] class [args...]
```

```
(to execute a class)
```

```
or java [-options] -jar jarfile [args...]
```

```
(to execute a jar file)
```

```
where options include:
```

```
-d32      use a 32-bit data model if available
-d64      use a 64-bit data model if available
```

Lab Incharge

  
HOD 01/01/24

Ref/AE/IT/2022-23/129

Date:-18/01/2023

To,  
The Principal,  
AVCOE, Sangamner

Subject: - To grant permission for Motherboards.

Respected Sir,

For smooth conduction of lab there is requirement of Motherboards. We had purchased computer before 10 years (Purchase Year 2012-2013). Now, it is checked by external party as well as Prof. Awadesh kumar but these computer Motherboards are nonreparable. The proposed details are as follows.

Sr. No.	Name of Item	Name of Lab	Details	Total Unit	Approx. Cost per Unit	Total
01	Mother Board	SL-I	61 Foxin Mother Board	04	3800/-	15200/-
02	Mother Board	SL-V	81 Foxin Mother Board	01	4900/-	4900/-
<b>Total</b>					<b>20,100/-</b>	

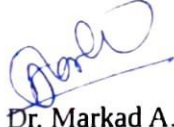

The approximate expenditure is Rs.20,100/- Copy of Lab requirement of Motherboards. Please, allow to purchase above Motherboards, sample quotation is attached for ready refrence.

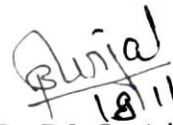

Thank you.

Your's faithfully,

  
Ms. Bhosale B.A  
(Technical Assistant)

  
Prof. Pawar R.B  
(Lab Incharge)

  
Dr. Markad A.V  
(Lab Incharge)

  
Dr. B.L.Gunjal  
H.O.D.[I.T.]

Respected sir,

As per checking and remarks by external party as well as prof Awadeshkumar, the motherboards of above 5 computers in IT department were non-reparable.

So, we need to purchase new motherboards. Please, allow to purchase.

**Xilinx, Inc. – Important Information Regarding Your Xilinx Software Purchase**

1 message

xilinx-stage.notification@entitlenow.com <xilinx-stage.notification@entitlenow.com>

Wed, Jul 25, 2012 at 4:10 PM

To: principal@avcoe.org

Dear REKHA PUNJAJI LABADE:

This notification is to inform you that your purchase of the following software product has been processed and is now available in your Product Entitlement Account on the Xilinx® Product Licensing Site:

ISE Design Suite - Logic Edition, University License 25 Seats

The following URL will take you directly to the Xilinx Product Licensing Site where you may generate a license the above product:

<http://www.xilinx.com/getlicense>

This email notification was sent to the email address Xilinx has on file for you in the Xilinx Product Licensing site. It is important that you use the same email address when logging into the Xilinx Product Licensing site to obtain your entitlements. Using a different email address may prohibit you from accessing your software products.

You have also been designated as the Primary Account Administrator for this Product Entitlement Account with permissions to create and administer licenses for your organization. If you are not the administrator of licenses for the product listed above, please contact your local Xilinx Customer Service Representative as noted below.

**Support Information**

For questions regarding products within your Product Entitlement Account or if you feel you have received this notification in error, send an email to your regional Customer Service Representative:

Canada, USA and South America – [isscs\\_cases@xilinx.com](mailto:isscs_cases@xilinx.com)  
Europe, Middle East, and Africa – [eucases@xilinx.com](mailto:eucases@xilinx.com)  
Asia Pacific including Japan – [apaccase@xilinx.com](mailto:apaccase@xilinx.com)

For technical support including the installation and use of your product license file you may contact Xilinx Online Technical Support at [www.support.xilinx.com](http://www.support.xilinx.com). On this site you will also find the following resources for assistance:

Software, IP and Documentation Updates  
Access to Technical Support Web Tools  
Searchable Answer Database with Over 4,000 Solutions  
User Forums - Chat Rooms and Discussion

Regards,

Xilinx Customer Service
