A Expert Talk Series

AMRUT MANTHAN 2018-19

Guest Lecture 2- Prevention and Protection of Base Isolated Structures subjected to Blast Induced Vibration

Recourse Person- Mr. Mohd Zain Kangda

PhD Research Scholar

VNIT, Nagpur

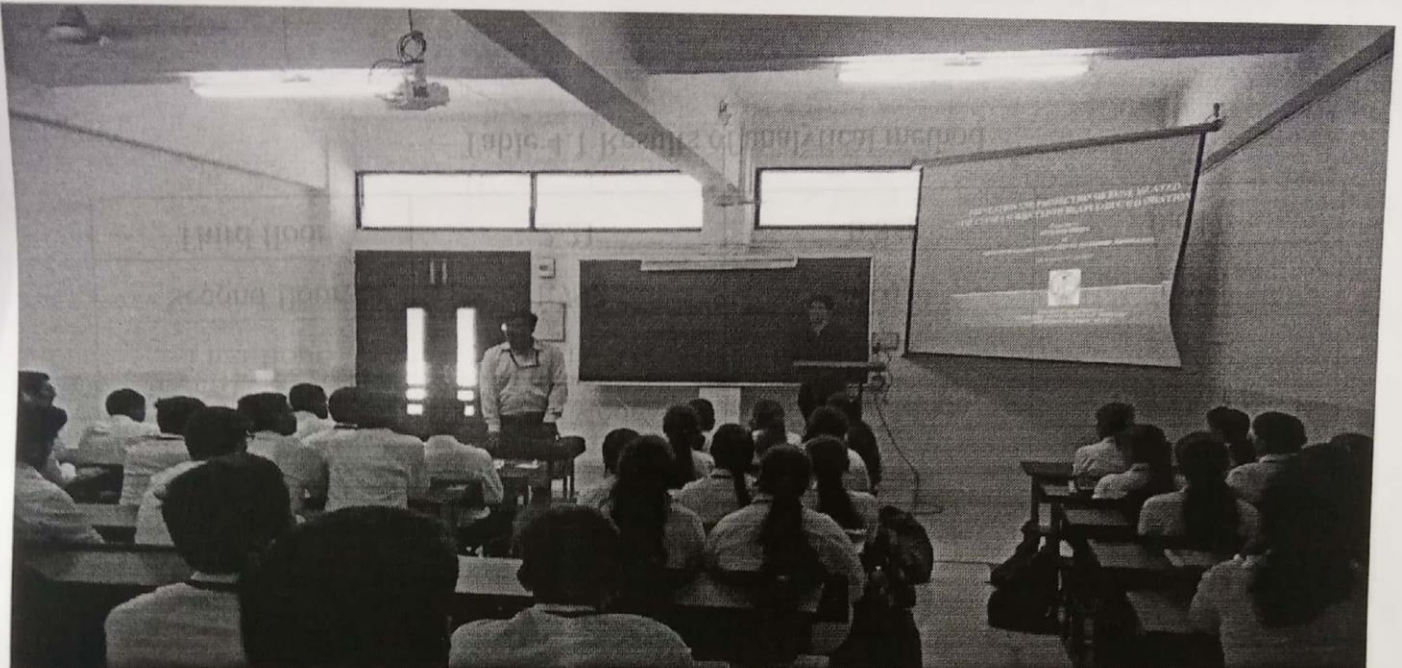

Date -02-07-2018

Venue – Class Room- F26

The guest lecture was planned for BE Civil Engineering students. The guest lecture was on **“Prevention and Protection of Base Isolated Structures subjected to Blast Induced Vibration”**. The aim of guest lecture was to give the detail information to students regarding Earthquakes, Earthquake zones in India, Different Theories related to Earthquake, Earthquake Forces. Sir has given the information to students about Earthquake Resistant Structure, Base Isolation Technique, Blast Induced Vibration and how to protect structure from Blast Induced Vibration. There were total 80 students present for the session. The session was from 9.00 am to 11.00 am. The students enjoyed the session a lot.

VNIT Nagpur

Sub: Letter of Appreciation

Sir,

Just a note to congratulate you on the outstanding lecture you delivered today on "Prevention and Protection of Base Isolated Structures subjected to Blast Induced Vibration" to BE Civil Engineering Students.

I felt you addressed the subject with openness, honesty and sensitivity. I believe many of students now understand the seriousness of the topic and how to deal with it much better than before. I especially appreciate the examples you gave and the point of law that you applied to each. I wish you success in your effort to educate all of our students in work place.

There is no doubt that you will be called upon to present again. I wish you the very best of luck. We are all looking forward to another chance to hear you.

AMRUT MANTHAN 2018-19

Guest Lecture 1- Shuttering, Concrete Technology and Project Management

Recourse Person- Mr. Hassan Chandrasekara

QA/QMS/QC Adviser, Pune

hassan.chandrasekara@gmail.com

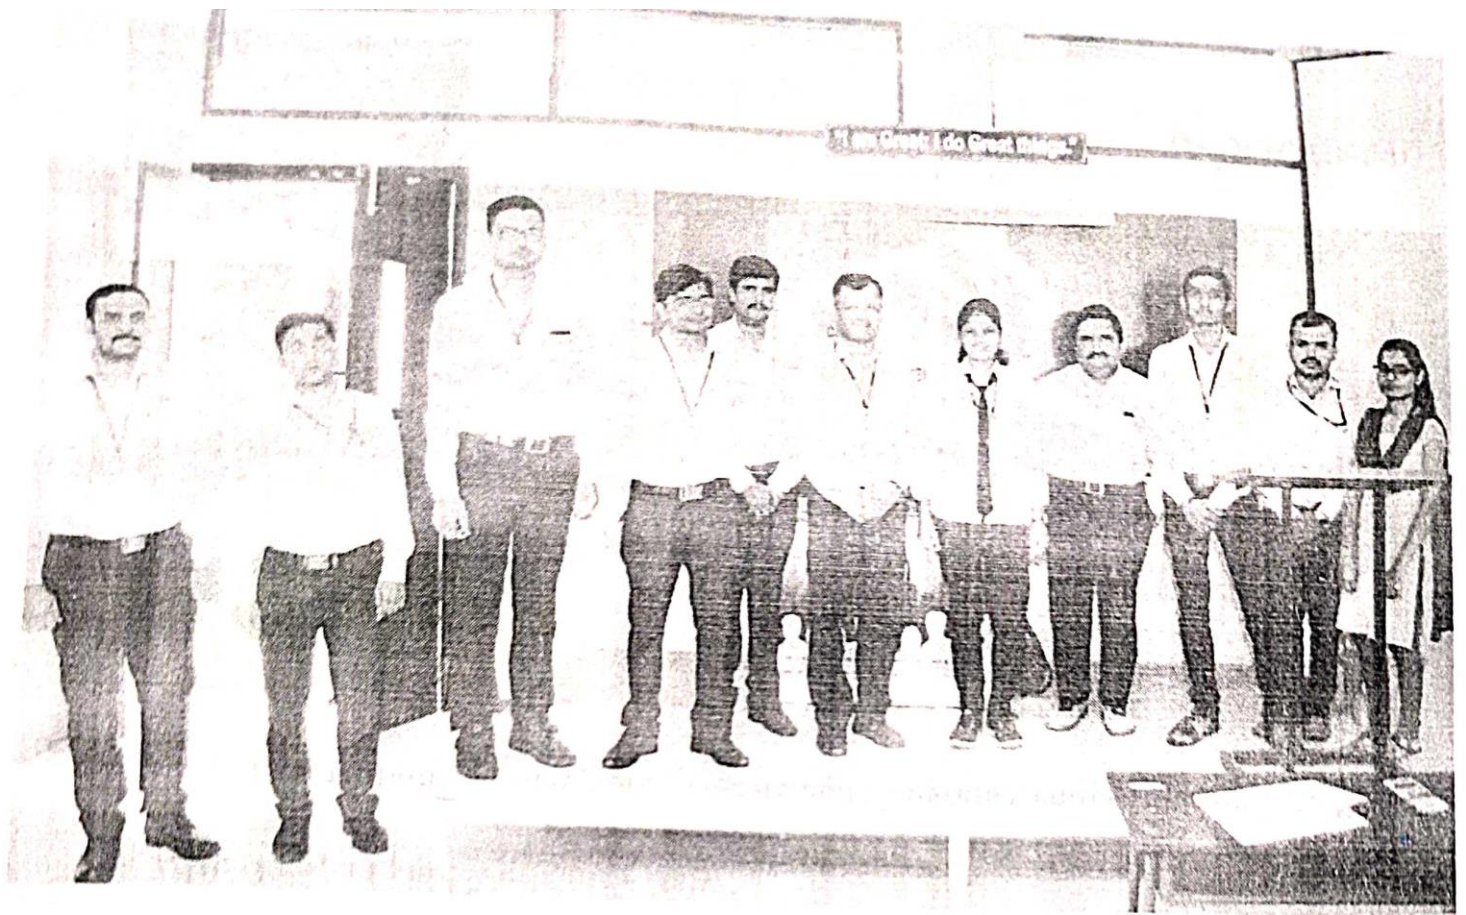

Contact No- 9763358221

Date -26-06-2018

Venue – Class Room- F26

The guest lecture was planned for SE TE and BE Civil Engineering students . For SE Students the lecture was on Shuttering, for TE students the lecture was on Concrete Technology and For BE students the lecture was on Project Management. The schedule for guest lecture is as below. The aim of guest lecture is to get the actual field knowledge students. Sir has given the information to students about new technologies available in market, different on field problems and their solutions. The session was interactive type. The session was very successful and students enjoyed the session.

Sr No.	Class	Topic	Time	Venue
1	SE	Shuttering	9.00am to 10.50 am	F26
2	TE	Concrete Technology	11.10am to 1.00 pm	F26
3	BE	Project Management	2.00pm to 3.50 pm	F26

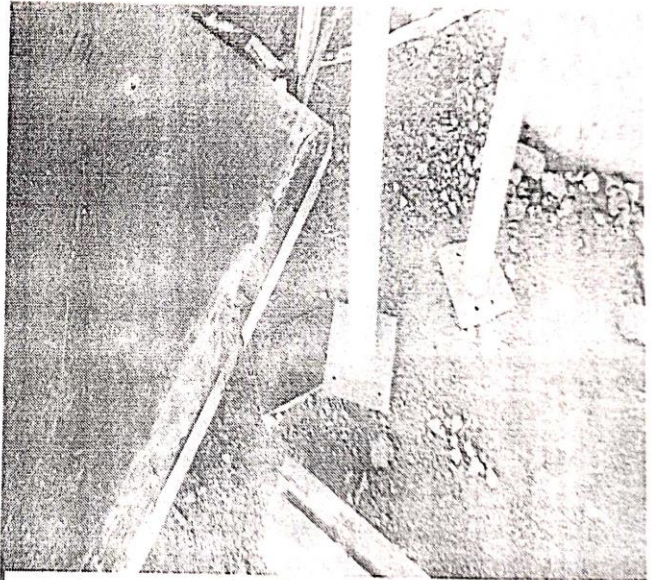

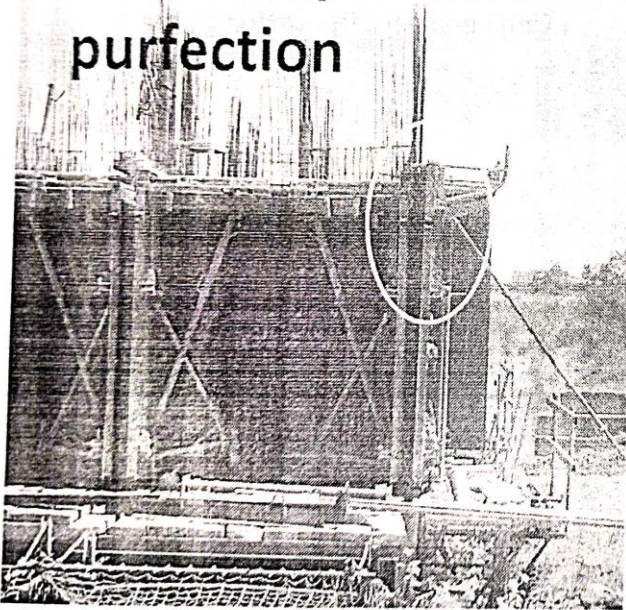

SHUTTERING

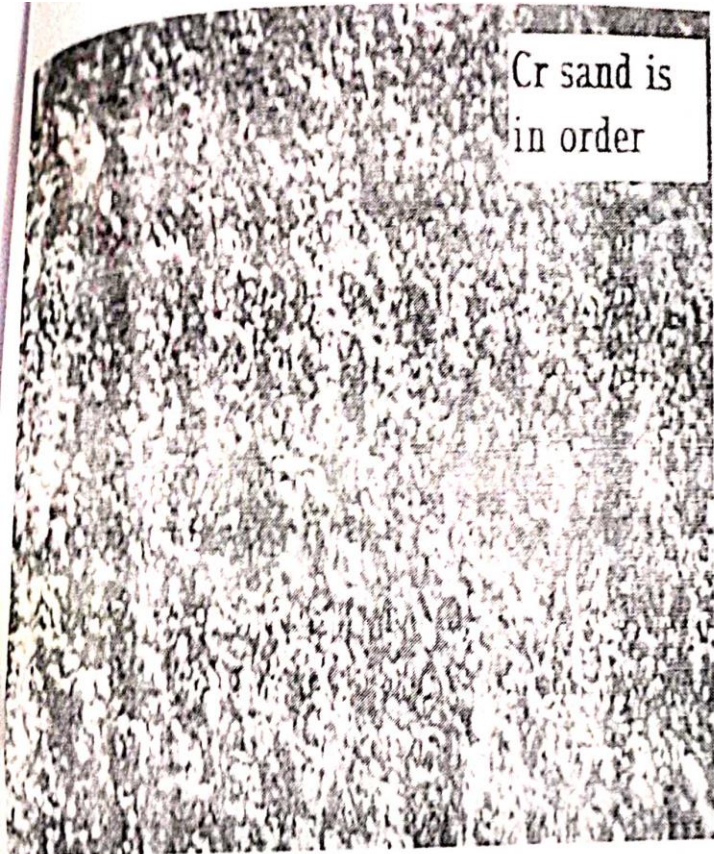

In any concrete shuttering is very much essential which consists of the surface which is directly coming under contact of concrete which holds the concrete in desired shape and alignment which may be of Mud shuttering, steel plates, ply boards, waffle moulds of fiber materials, MS sheets etc. Supported by wooden runners, MS angles, and Acrow spans placed with vertical supporting of casolona bellies runner's, jacks, Coupler blocks etc. The shuttering will be designed considering the thickness and weight of concrete slab / column beam etc, structures span to be supported working load mode of placement.

Considering all the aspects the mould will be created as per drawings and design aspects care will be taken to avoid slurry leakages, any sort of openings in the mould / to withstand the load above / any dynamic forces at the time of placement / perfect adherence with old concrete structures will be taken in to accounts and also packing or sealing the board joint cavities with cello tape form strip with proper adhesives. Further the proper back up supporting of grid works with runners are column box, back supporting etc considering the design aspects in a direction of keeping the stability of the mould at the time of concrete.

Verticality needs perfection

Baseplate fixity in props needs perfection observed defective

Cr sand is
in order

Fracture

Materials Used in Concrete

PROJECT MANAGEMENT

Project management is the practice of initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time. A project is a temporary endeavor designed to produce a unique product, service or result with a defined beginning and end (usually time-constrained, and often constrained by funding or staffing) undertaken to meet unique goals and objectives, typically to bring about beneficial change or added value. The temporary nature of projects stands in contrast with business as usual (or operations), which are repetitive, permanent, or semi-permanent functional activities to produce products or services. In practice, the management of such distinct production approaches requires the development of distinct technical skills and management strategies.

The primary challenge of project management is to achieve all of the project goals within the given constraints. This information is usually described in project documentation, created at the beginning of the development process. The primary constraints are scope, time, quality and budget. The secondary and more ambitious challenge is to optimize the allocation of necessary inputs and apply them to meet pre-defined objectives. The object of project management is to produce a complete project which complies with the client's

objectives. In many cases the object of project management is also to shape or reform the client's brief in order to feasibly be able to address the client's objectives. Once the client's objectives are clearly established they should impact on all decisions made by other people involved in the project - project managers, designers, contractors, sub-contractors, etc. If the project management objectives are ill-defined or too tightly prescribed it will have a detrimental effect on decision making.
