

Teaching Learning Practices

Department of First year Engineering has been implemented teaching learning practices for better understanding of concepts, to the students. Main objectives of teaching learning practices is to get student to become more effective learners, it helps student to memorize contents. During the class of teaching, learning practices encouraging students for study by doing activities like surprise test, only numerical based practice, active question- answering on specific topic along with thoroughly topic explanations etc.

It is found that teaching learning practices help students to achieve the kind of active and deep learning. Students are actively engaged in the teaching learning practices. Teaching learning practices helps in improvement of result of not only the individual student but also increases the overall result of the whole class.
